

STRATTON DOUBLE

Elevate your space with our elegant range of solid wooden lighting bollards. Each unit is equipped with energy-efficient, low-voltage LED lamps, making them ideal for a variety of settings—car parks, driveways, pathways, commercial zones, and even coastal environments.

With its bold, generous proportions, the Stratton Double makes a striking impression wherever it's placed, delivering years of dependable performance. Crafted from materials that are either recyclable or naturally biodegradable, this product reflects our belief that great design shouldn't leave a lasting environmental footprint.

To help you enjoy its natural beauty from the start, we apply a coat of a natural oils before it leaves our workshop. This highlights the rich grain and vibrant tones of the wood, preserving its charm over time.

Milled from sustainably sourced “green” timber, each bollard is unique. Over time, natural cracking, twisting, and warping may occur—adding character and ensuring no two pieces are ever the same.

Installation is quick and simple: just dig a hole, secure the bollard with your preferred concrete mix, and connect the power using a waterproof electrical connector (not included). That's it!

The electrical connection needs to be carried out by a qualified electrician.

Features & Benefits

- Oak & Larch timber options
- Easy to install
- Low maintenance
- Low energy
- Sustainably sourced timbers
- Replaceable 240v 1.3w Light source with flying lead
- Warm white 3000k, LED driver included

Optional Extras

- WIFI remote control
- Ground mounting plate (Specify at time of ordering) 900mm high post
- PIR Motion sensors
- Dust to dawn sensors
