

STRATTON SINGLE

Add a touch of natural elegance to your space with the Stratton Single—our beautifully crafted solid wooden lighting bollard. Fitted with a low-voltage, energy-efficient LED lamp unit, it’s perfect for a variety of settings including car parks, driveways, pathways, commercial spaces, and even coastal areas.

With its bold proportions, this lighting bollard is designed to stand out and provide dependable performance for years. Made from components that are either recyclable or naturally biodegradable, it reflects our commitment to sustainable, responsible design—because great style shouldn’t leave a lasting footprint.

To help you enjoy its natural beauty from the start, we apply a coat of a natural oils before it leaves our workshop. This highlights the rich grain and vibrant tones of the wood, preserving its charm over time.

Each unit is milled from sustainably sourced “green” timber, which means it will naturally crack, twist, and warp over time. This is a normal part of the aging process and adds unique character—no two are ever the same.

Installation is quick and simple: just dig a hole, secure the bollard with your preferred concrete mix, and connect the power using a waterproof electrical connector (not included). That’s it! The electrical connection needs to be carried out by a qualified electrician.

Features & Benefits

- Oak & Larch timber options
- Easy to install
- Low maintenance
- Low energy
- Sustainably sourced timbers
- Replaceable 240v 1.3w Light source with flying lead
- Warm white 3000k, LED driver included

Optional Extras

- Dusk to dawn sensor
- PIR sensors
- WIFI remote control
- Ground mounting plate (requires specifying at time of order) 900mm high post
